SANISTATION

SANITIZATION TOTEM

ZILFOR
PRECISION FURNITURE

SANISTATION is the brand new ZILFOR device which, thanks to a perfect combination of modern design and practicality, represents the ideal option for any type of environment and user.

The niches, which accommodate gloves, masks, sanitizing liquid and shoe covers, are marked with identification plates and numbered in such a way as to communicate a precise sequence of use.

The entire structure is made of folded and welded sheet metal and any color included in the RAL scale is available.

As for the replenishment and removal of disposable devices, you have two comfortable doors located on the back. Upon request, the closure can be equipped with a lock and key. This cabinet in the back of the Sanistation can be used to store additional replacement material.

ML

GLOVES

The upper niche, marked by no. 4, dispenses up to two sizes of disposable gloves.

MASKS

The intermediate niche is home to the masks and is marked with no. 3

SANITIZING LIQUID

The lower niche, positioned at hand height, houses a refillable dispenser equipped with a photocell for the contact-free release of the sanitizing liquid and a drip tray and is marked with no. 2.

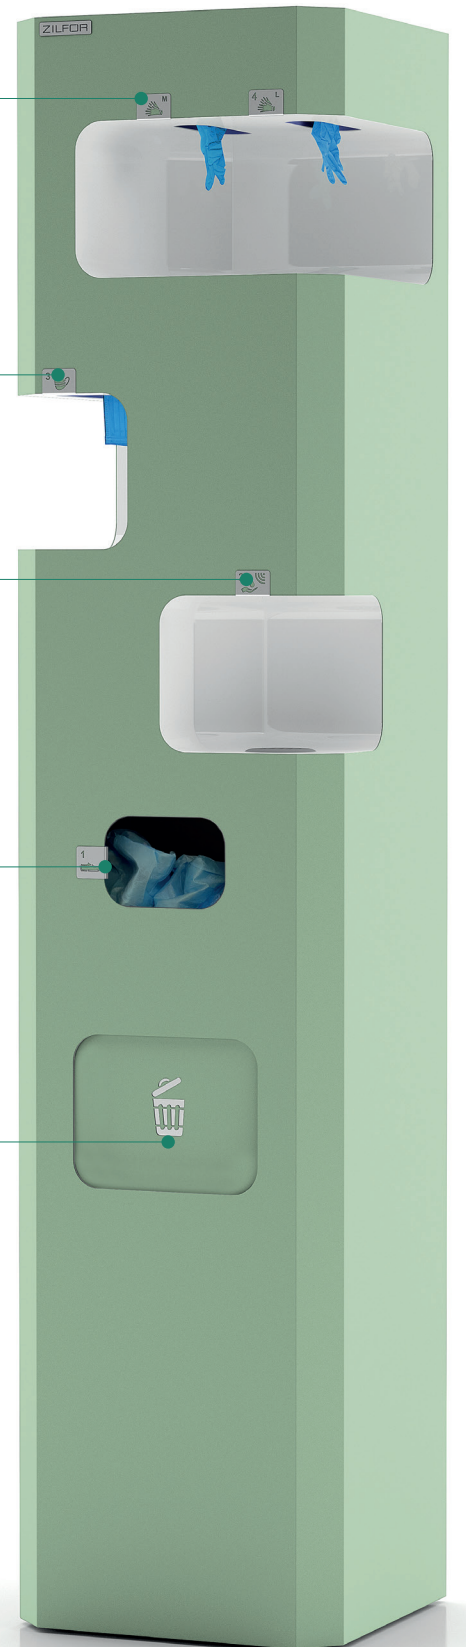

DISPOSABLE SHOE COVERS

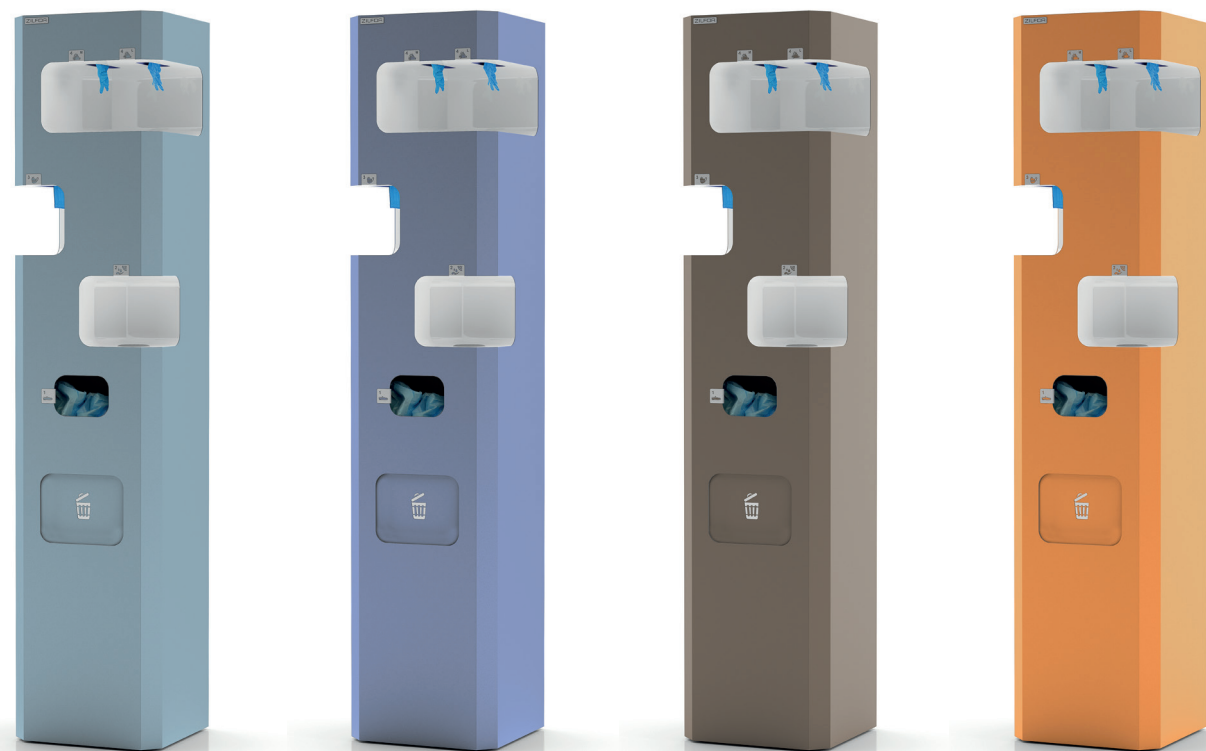

Marked by no. 1, we find the disposable dispenser reserved for shoe covers.

WASTE COLLECTION CONTAINER

On the lower level, we find the compartment reserved for the rubbish bin reserved exclusively for disposable products and carefully isolated from the upper cabinet containing the sterile disposable products.

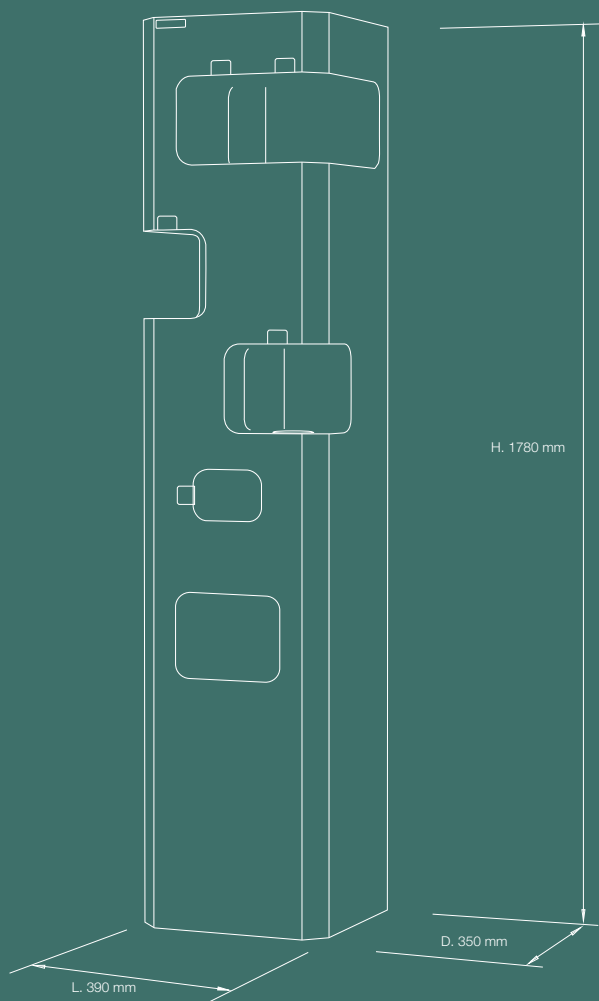

SANISTATION is a project created to bring together all the material necessary for the proper performance of any activity in a single device, suitable for any space and easy to clean thanks to the rounding present in the corners. In order to guarantee hygiene, each product is removed by avoiding contact with the structure.

Thanks to a design philosophy based on flexible mobility, SANISTATION can be easily transported to any space using the two wheels on the back and is immediately functional since it does not require any electrical connection.

SANISTATION can be ordered in any colour from the RAL system with gloss or matte finish.
